Index to Volume 5

Subjects

(L) denotes Letter to the Editor,

(N) short note,

(R) conference or exhibition report

Absolute method for the determination of resistance 372(L)

A lecture match 321

AFO 185(L)

An electrical analogue of the diffraction grating 332

Analysis, of gas, physical methods 41

Applied physics, HND 57(L)

Archimedian upthrust 370(L)

Astronomy, study plan 72

Atmosphere, tidal motion of 37

Atomic structure, demonstration of 311(L)

Barriers, potential 298

Biophysicists and bioengineers, the education of 8

Book list, general 65

Book reviews 370(L)

Bragg's law for X ray crystal diffraction 371(L)

Brain teaser 7, 169, 220, 265

Careers for physicists in the Royal Dutch/Shell Group 129

Careers in computer time sharing 159

Careers in EMI 136

Careers in ICI plastics division 155

Careers in Kodak 145

Careers in measurement and control 140(N)

Careers in the safety glass industry 152

Careers in the textile industry 149

Colour, light and the eye 68

Colour television 326

Cool? 57(L)

CERN, popularisation of science at 232

Clare school, radio telescope 266

Coincidence counting techniques in the study of gamma rays 25

Computer, an educational analogue 206

Computer in physics education 212(R)

Computer for education 158(N)

Computer time sharing, careers 159

Cosmic ray physics 349

Current drain restrictions 312(L)

Decimalisation, metrication and SI units 48(N)

Diesel engine, performance of a miniature 170

Diode differential thermometer 248(L)

Direct conversion of chemical energy into electricity 18

Direct conversion of solar light energy into electricity 100

Discontinue the calorie 374(L)

Do centrifugal forces exist? 369(L)

Earth's interior, seismic waves 162

Education group 118

Education, physical sciences in a college of 50

Electrical properties of glasses 97

Electrical properties of semiconducting films 257

Electromagnetism and SI 246(L)

Electromagnetism and SI 371(L)

Electronics, more 76

Energy and fuels 66

Engineers, education of 94

Equations of motion 249(L)

Excitons 226

Eye, light and colour 68

Feedback as an aid in teaching physics 221

Fermi-Dirac statistics 305

Film reviews,

Entropy 24

Half life 24

using the oscilloscope 24

Flow visualisation 262

Fools rush in 271

Fourier methods in optical systems 46

Frequency differences between pure tones of short duration, measuring method 49

Fringes, Moiré 106

Fuels and energy 66

Gamma rays using coincidence counting techniques 25

Gamma spectroscopy, school project 271

Gas analysis, physical methods of 41

Gas meter, cheap 86

Glasses, electrical properties of 97

Graduate recruitment campaign 148

Graduates, teacher training for 54(R)

Hall effects, positive and negative 181(L)

Heat, using the Joule to teach 292

HND in applied physics 57(L)

Induction, charging by 247(L)

Interaction between permanent magnets 275

Interference, demonstrating 247(L)

Interferometry, multiple beam, in elementary teaching 1

Integrated circuits 7(N)

Introducing SI units 374(L)

Joule, teaching heat using 292

Kinetic theory 120(L)

Kodak and the physicist 145

Lasers for studying air pollution 50(N)

Lasers in industry 338

- Light, colour and the eye 68
 Liquid behaviour 113
 Low temperature bibliography 75
- MAC, an educational analogue computer 206
 Machine tool research, the physicists in 141
 Magnetic flux density and SI units 58(L), 185(L), 312(L)
 Manufacturers exhibition, ASE annual meeting 177(R)
 Materials science 70
 Mathematics and science teachers, shortage of 236
 Matlock, B Ed at 313(L)
 Medical physics, an outline 79
 Meteorology 73
 Metrication, decimalisation and SI units 48(N)
 Moiré fringes 106
 Mole, the unit of amount of substance 122(L)
 Mole, unit of amount of substance only 310(L)
 Molecular forces 119(L)
 Motional emf 121(L)
 Multiple beam interferometry in elementary teaching 1
 Multivibrator 55
- Names in physics
 André Marie Ampère 359
 Fresnel 175
 Hertz 229
 Joseph, Henry 84
 Tesla, Nikola 280
 Wheatstone, Charles 34
 Negative mass 184(L)
 Newtons second law 122(L)
 Nomenclature in SI 56(L)
 Nuffield advanced physics 144(N)
- Objectives of telescopes, power of 238
 Optical systems, Fourier methods in 46
 Oscillators using ring magnets 244
- Peltier effect, demonstrating 123(L)
 Pendulum experiments 119(L)
 Permanent magnets, interaction between 275
 Physics crossword 11, 112, 161, 213, 291
 Physics exhibition 1970 240(R)
 Plane angle 242
 Pollution, lasers for studying in 50(N)
 Potential barriers in diagrams 298
 Power of the objectives of telescopes 238
 Practical physics, aims 56(L)
- Queries in physics 17, 105, 140, 231, 270
- Radiation absorbed dose 184(L)
 Radiation models 12, 248(L)
 Rad, unit of dose of radiation 313(L)
 Radio, amateur publications 78(N)
 Radio telescope, the Clare school 266
 Resistance, absolute determination of 174
 Resonance demonstration 57(L)
 Responsibilities in physics education 36(N)
 Rutherford's experiments on thorium 214
- Scaler 344
 Science centre, north London 180
 Scientific research in schools 374(L)
 Scientist as teacher 148(N)
 Scotland annual meeting of ASE 203(R)
 Scotland, project work in the sixth form 199
 Scotland, teaching physics in 193
 Seismic waves and the earth's interior 162
 Semiconductor films, electrical properties of 257
 Shortage of mathematics and science teachers 236
 SI and electromagnetism 246(L)
 Simple pendulum 246(L)
 SI nomenclature 56(L)
 SI text books for A level heat 313(L)
 SI units and magnetic flux density 185(L)
 SI units, decimalisation and metrication 48(N)
 SI units, magnetic flux density 58(L), 312(L)
 SI units, the introduction of 239(R)
 SI units, volume 185(L)
 Slide rule 17(N)
 Solar light energy into electricity, direct conversion 100
 Specific psalmody 312(L)
 Standard cell, current drain restrictions 183(L)
 Strain, effects on the electrical properties of semiconductor films 257
- Teacher training for science and mathematic graduates 54(R)
 Teaching experiment using ultrasonic waves in oil 355
 Telescopes, power of the objectives of 238
 Thorium, Rutherford's experiments 214
 Tidal motion of the atmosphere 37
 Training science teachers 288
 Transistor, in A level courses 56(L)
 Triboelectrification 87
- Vector notation mis-use 313(L)
- Wind tunnels, low speed flow visualisation 262
- X ray, wave length units 82

Physics Apparatus

- Absorptiometer Nephelometer MLI 261
 Breadboard systems, DeC 135
 Computikit 1 205
 Dual stabilized power supply 135
 Fluid-logic design kit 261
 Laser, educational 34
 Miniature Wheatstone Bridge 358
 Mutual inductor 205
 Printed circuitry produced in minutes 135
 Stroboscope for the classroom 135
 'Torovolt' model 38 ZL 34
 Transparency-maker kits 205

Authors/with titles

(L) denotes Letter to the Editor,

(R) conference or exhibition report

Alexander, D J, and Trotter, A W: North London Science Centre 180(N)

Allenson, M B, Taylor, K N R, with Piercy, A R: A simple quantitative experiment on Fourier methods in optical systems 46

Archenbold, W F, and Jarvis, W H: Manufacturers' exhibition at the ASE annual meeting 177(R)

Armstrong, H L: On the power of the objectives of telescopes 238

Ayes, A J P: Some aspects of liquid behaviour 113

Baldwin, J: Discontinue the calorie 374(L)

Belham, N D N: A convenient and absolute method for the determination of resistance 174

Best, W J: Use of an AFO 185(L)

Betts, D S, and Walton, A J: A lecture match 321

Bignell, K J: Book list on meteorology 73

Birley, A W, with Lamb, P: Employment of physicists in ICI Plastics Division 155

Bunton, M H H: Physical sciences in a college of education 50

Burchell, H W: The place of the transistor in A level physics courses 56(L)

Burge, E J: Potential barriers in diagrams 298

Burlin, T E: An outline of medical physics 79

Calder, D A: The feedback classroom as an aid in the teaching of physics 221

Carreras, R: Popularization of science at CERN 232

Cawthorne, R G: Teacher training for science and mathematics graduates 54(R)

Chadwick, D K: A simple demonstration of atomic structure 311(L)

Chester, P F: Fuels and energy 66

Clarke, G: Molecular forces 119(L)

Codling, J C: The Clare school radiotelescope 266

Colvill, K: Pendulum experiments 119(L)

Copley, G N: Plane angle as a physical quantity 242

Cooper, M L: Fresnel 175

Copley, G N: Mole as a unit of amount of substance only 310(L)

Deeson, E: Hertz 229

Delaney, F with Harland, D B: Charging by induction 247(L)

Dorling, G W: Aims of practical physics 56(L)

Dormer, A H: Publications for amateur radio 78(N)

Durling, J R: MAC, an educational analogue computer 206

Edwards, S J: X ray wavelength units 82

Eyles, P: SI units of volume 185(L)

Fay, L E: Demonstrating the Peltier effect 123(L)

Firth, I: Cool? 57(L)

Fitzgerald, L M: Physicists in the safety glass industry 152

Flower, N C: Ernest Rutherford's experiments on thorium 214

Freeman, K G: Colour television 326

Galloway, R B: An introduction to the use of coincidence counting techniques in the study of γ rays 25

Gee, B: André Marie Ampère 359

Goodier, J, with Osborne, J M: The Physics Exhibition 1970 240(R)

Greaves, C: The direct conversion of solar light energy into electricity 100

Greaves, C: The direct conversion of chemical energy into electricity 18

Green, J S A: The tidal motion of the atmosphere 37

Greenwood, K: Opportunities in the textile industry 149

Griffiths, L: The introduction of SI units in schools 239(R)

Harland, D B, and Delaney, F: Charging by induction 247(L)

Harper, W R: Triboelectrification 87

Heddl, D W O: Oscillators using ring magnets 244

Helsdon, R M: Do centrifugal forces exist? 369(L)

Hill, D W: Some physical methods of gas analysis 41

Hinson, D J: Equations of motion 249(L)

Hinson, D J: Newton's second law 122(L)

Hockey, S W: Magnetic flux density in SI units 312(L)

Hughes, J *et al*: Project work in the sixth form in Scotland 199

Hume, J: A cheap gas meter 86

Jaggard, T F B: Science teacher training 288

James, H W: SI textbooks for A level heat 313(L)

James, H: Lasers in industry 338

James, W G G: Radiation models 12

Jarvis, C Mackenzie: Nikola Tesla and the induction motor 280

Jarvis, W H: The Annual meeting of the Scottish ASE 203(R)

Jeans, A F: Radiation absorbed dose 184(L)

Jenkins, J: Resonance demonstration 57(L)

Jenkins, J: Scientific research in schools 374(L)

Jenkins, J: So they want more electronics 76

Jenkins, R M: The HND in applied physics 57(L)

Karley, B: B Ed in physics at Matlock 313(L)

Lamb, P and Birley, A W: Employment of physicists in ICI Plastics Division 155

Lane, A: Oscillation of a simple pendulum 246(L)

Lewis, R: Computers in physics Education 212(R)

Lindsay, F J M: Absolute method for the determination of resistance 372(L)

Lindsay, F J M: Archimedian upthrust 370(L)

Long, R E: Seismic waves and the Earth's interior 162

Lyon, K W: Magnetic flux density and SI units 185(L)

- Mace, W K: Electromagnetism and SI 371(L)
 McIlraith, A H: The physics of Moiré fringes 106
 Macleod, A N: An electrical analogue of the diffraction grating 332
 McNeill, D J: Positive and negative Hall effects 181(L)
 McMenemey, J D S: Negative mass falling upwards? 184(L)
 Metters, P J, and Williams, R P: An accurate method of measuring small frequency differences between pure tones of short duration 49
 Money, C: The life and work of Sir Charles Wheatstone 34
 Morris, F: A differential diode thermometer 248
 Ogborn, J M: Electromagnetism and SI 246(L)
 Osborne, J M, and Goodier, J: The Physics Exhibition 1970 240(R)
 Padgham, C A: Light, colour and the eye 68
 Percival, N: The role of the physicist in machine tool research 141
 Perrens, D F: Flow visualization in low speed wind tunnels 262
 Phillips (Rev.), M D: Current drain restrictions 312(L)
 Piercy, A R, Allenson, M B, and Taylor, K N R: A simple quantitative experiment on Fourier methods in optical systems 46
 Pinnock, K: Introducing SI units 374(L)
 Pitt, I T: Kodak and the physicist 145
Praeceptor: Electrical properties of glasses 97
Praeceptor: Excitons 226
 Preece, P F W: The force of interaction between permanent magnets 275
 Rastin, B C: Cosmic Ray Physics 349
 Reece, B L: Teaching experiment using ultrasonic waves in oil 355
 Richards-Jones, P: Study plan for astronomy 72
 Riley, R: Bragg's law for X ray crystal diffraction 371(L)
 Ritchie, W R: Teaching physics in Scotland 193
 Rosenburg, H M: Low temperature bibliography 75
 Rosen, D: On the education of biophysicists and bioengineers 8
 Rosser, W G V: Motional emf 121(L)
 Sayer, M: Educating the future engineer 94
 Scammell, R: Mole as the unit of amount of substance 122(L)
 Scammell, R J: Specific Psalmody 312(L)
 Schofield, R: Nomenclature in SI 56(L)
 Scruton, R: Magnetic flux density and SI units 58(L)
 Seller, J P: Demonstrating interference 247(L)
 Seller, J P: Kinetic theory 120(L)
 Shaw, R E M: Teaching heat using the joule 292
 Side, E A: The shortage of mathematics and science teachers 236
 Siddons, J C: Conundrum 198
 Silcock, G W H: Equations of motion 249(L)
 Simons, H A B: Rad, a unit of dose of ionizing radiation 313(L)
 Smith, L V: Joseph Henry 84
 Smolins, H: Current drain restrictions on a standard cell 183(L)
 Smyth, A J M: Where angels fear to tread 271
 Steadman, R: Materials science 70
 Steel, G G: The effects of strain on the electrical properties of thin evaporated films of semiconductor compounds 257
 Stevenson, P W: An investigation into the performance of a miniature diesel engine 170
 Tawney, D A: Book reviews
 Tawney, D A: Scaler 344
 Taylor, C A: A general booklist 65
 Taylor, K N R, Piercy, A R, with Allenson, M B: A simple quantitative experiment on Fourier methods in optical systems 46
 Tolansky, S: Multiple beam interferometry in elementary teaching 1
 Trotter, A W, with Alexander, D J: North London Science Centre 180(N)
 Tydeman, P A: Computer time-sharing, a rapidly growing industry 159
 Walton, A J with Betts, D S: A lecture match 321
 Welford, J: Radiation models 248(L)
 Whelan, P M: The misuse of vector notation 313(L)
 White, O M: Projects in Science 245(R)
 Whitworth, R W: An elementary approach to Fermi-Dirac statistics 305
 Williams, R P, with Metters, P J: An accurate method of measuring small frequency differences between pure tones of short duration 49
 Wray, E M: Teaching the multivibrator 55

Contents of Volume 5

January 1970

- Multiple beam interferometry in elementary teaching: S TOLANSKY 1
on the education of biophysicists and bioengineers: D ROSEN 8
radiation models: W G G JAMES 12
the direct conversion of chemical energy into electricity: C GREAVES 18
an introduction to the use of coincidence counting techniques in the study of γ rays: R B GALLOWAY 25
the life and work of Sir Charles Wheatstone 1802–75: C MONEY 34
the tidal motion of the atmosphere: J S A GREEN 37
some physical methods of gas analysis: D W HILL 41
a simple quantitative experiment on Fourier methods in optical systems: A R PIERCY, M B ALLENSON and K N R TAYLOR 46
an accurate method of measuring small frequency differences between pure tones of short duration: P J METTERS and R P WILLIAMS 49
physical sciences in a college of education: M H H BUNTON 50
teacher training for science and mathematics graduates: R G CAWTHORNE 54
teaching the multivibrator: E M WRAY 55
letters to the Editor 56
book reviews 59
forthcoming conferences and courses 64

March 1970

- Useful references for physics teachers
a general booklist: C A TAYLOR 65
fuels and energy: P F CHESTER 66
light, colour and the eye: C A PADGHAM 68
materials science: R STEADMAN 70
study plan for astronomy: P RICHARDS-JONES 72
booklist on meteorology: K J BIGNELL 73
low temperature bibliography: H M ROSENBERG 75
do they want more electronics!: J JENKINS 76
publications for amateur radio: A H DORMER 78
an outline of medical physics: T E BURLIN 79
X-ray wavelength units: S J EDWARDS 82
Joseph Henry (1797–1878): L V SMITH 84
cheap gas meter: J HUME 86
triboelectrification: W R HARPER 87
education the future engineer: M SAYER 94
the electrical properties of glasses: A E OWEN 97
the direct conversion of solar light energy into electricity: C GREAVES 100
the physics of moiré fringes: A H MCILRAITH 106
some aspects of liquid behaviour: A J P AYRES 113
letters to the Editor 119
book reviews 123
forthcoming conferences and courses 128

May 1970

- Physicists in the Royal Dutch/Shell Group 129
Careers in EMI 136
The role of the physicist in machine tool research: N PERCIVAL 141
Kodak and the physicist: I T PITT 145
Opportunities in the textile industry: K GREENWOOD 149
Physicists in the safety glass industry: L M FITZGERALD 152
Employment of physicists in ICI Plastics Division: P LAMB and A W BIRLEY 155
Computer time-sharing, A rapidly growing industry: P A TYDEMAN 159
Seismic waves and the Earth's interior: R E LONG 162
An investigation in to the performance of a miniature diesel engine: P W STEVENSON 170
A convenient and absolute method for the determination of resistance: N D N BELHAM 174
Fresnel: M L COOPER 175
Manufacturers exhibition at the ASE annual meeting 177
North London Science Centre 180
Letters to the Editor 181
Book reviews 186
Forthcoming conferences and courses 192

July 1970

- Teaching physics in Scotland: W R RITCHIE 193
Project work in the sixth form in Scotland: JOHN HUGHES 199
The annual meeting of the Scottish ASE: W H JARVIS 203
'MAC' – an educational analogue computer: J R DURLING 206
Computers in physics education: R LEWIS 212
Ernest Rutherford's experiments on thorium: N C FLOWER 214
The feedback classroom as an aid in the teaching of physics: D A CALDER 221
Excitons: *Praeceptor* 226
Hertz: E DEESON 229
Popularization of sciences at CERN: R CARRERAS 232
The shortage of mathematics and science teachers: E A SIDE 236
On the power of the objectives of telescopes: H L ARMSTRONG 238
The introduction of SI units into schools: L A GRIFFITHS 239
The Physics Exhibition 1970: J M OSBORNE and J GOODIER 240
Plane angle as a physical quantity: G N COPLEY 242
Oscillators using ring magnets: D W O HEDDLE 244
Projects in science: O M WHITE 245
Letters to the Editor 246
Book reviews 250

September 1970

- The effects of strain on the electrical properties of thin evaporated films of semiconductor compounds: G G STEEL 257
- Flow visualization in low speed wind tunnels: D F PERRENS 262
- The Clare school radiotelescope: J C CODLING 266
- Where angels fear to tread: A J M SMYTH 271
- The force of interaction between permanent magnets: P F W PREECE 275
- Nikola Tesla and the induction motor: C MACK-ECHNIE JARVIS 280
- Science teacher training: T F B JAGGER 288
- Teaching heat using the joule: ROBIN E M SHAW 292
- Potential barriers in diagrams: E J BURGE 298
- An elementary approach to Fermi-Dirac statistics: R W WHITWORTH 305
- Letters to the Editor 310
- Book reviews 314
- Forthcoming conferences and courses 320

November 1970

- A lecture match or 'Anything you can do I can do better': D BETTS and A WALTON 321
- The physics of colour television: K G FREEMAN 326
- An electrical analogue of the diffraction grating: A N MACLEOD 332
- Lasers in industry: H JAMES 338
- How do you use a scaler?: D A TAWNEY 344
- Selected topics from cosmic ray physics: B C RASTIN 349
- A teaching experiment using ultrasonic waves in oil: B L REECE 355
- Andr  Marie Amp re (1775-1836): B GEE 359
- Letters to the Editor 369
- Physics texts in SI units 375
- Book reviews 377
- Conferences and courses 384
